PROFESSIONAL SUMMARY OR Headline (2- 3 Word Self-Descriptor of Role Capable)

While not required, a Summary sections are common on executive résumés; and if well written, it can immediately engage the reader to read further. In other words, the Summary section presents a crystallization of your personal sales pitch or business case and engages the reader in your brand by immediately highlighting your top selling points. The best summaries highlight not only your key selling points, but also differentiate you from the competition, many of whom have some of the same credentials you do. This should be written in a very declarative, active voice or “AS IF” posture.

You do not want to simply present the facts about your background and hope that employers derive the right message about what you can do for them. You want to shape their thinking right out of the gate to reflect your personal brand.

(Skill Sets – 6 – 9 one or two word descriptor that captures keyword skill (combination of industry desired, business acumen, and leadership/interpersonal that align with skills, knowledge-base, etc. highlighted in position announcements)
